

Access to SEDI has been restricted to web browsers with a minimum 128 bit encryption (cipher strength). To check your encryption level once on the internet, simply click "Help" on your browser's toolbar, select "About Internet Explorer" and look at 'Cipher Strength'. If it is less than 128-bit then you will need to download a higher version of encryption. Should you have any questions, please contact the CDS INC. Technical Service Desk at 1-800-219-5381.
